

WARM IN WINTER, COOL IN SUMMER, AFFORDABLE ALL YEAR ROUND!

Tenant and climate movement unite for low rents and genuine renovation

We are tenants and climate activists from all over Germany and **we are calling for a social heating transition!** We want well-renovated homes – warm in winter, cool in summer, affordable all year round. To achieve this, laws must be changed.

Away with gas! Don't be afraid of your next heating bill

Fossil gas is bad for the climate and bad for tenants. Huge heating bills show how **gas is becoming a cost trap.** We need renewable heat and energy-efficient renovations so that our homes don't waste valuable energy in winter.

Get rid of the modernisation levy!

Currently, ALL costs for energy-efficient modernization can be passed on to tenants. Landlords don't even have to prove whether energy has been saved at all. **This system is unfair,** inefficient and must be abolished urgently.

We are joining forces!

In local initiatives, we are fighting against horrendous heating costs and for affordable energy-efficient renovations – with the heating cost strike. **Join in!**
